Bass Guitar Speakers

PULSE XL 10.20

10-inch steel-chassis bass guitar speaker

10in 254mm | Ferrite | 400W Watts | 8 Ohm | 92 dB

Great by itself and even better in a 4x10, the PULSE XL 10.20 provides more bass than you'd ever imagine from a 10-inch speaker, along with the speed of response that makes small diameter drivers so popular with bass players that want to cut through the mix. A fabric dust dome contributes to a particularly articulate treble response.
